## EDUCATION

B.S. Dual Major in Business Administration and C.S.  
University of Michigan

📅 August 2024 - current

📍 Ann Arbor

🎓 3.8

## CAREER OBJECTIVE

Full-stack JavaScript engineer with experience building AI-enhanced web apps using React, Next.js, Node.js, and PostgreSQL. Founded Truvestor, a stock analytics SaaS that processes over 100K rows/day, integrates GPT-powered sentiment pipelines, and deploys via Supabase + Vercel CI/CD. Skilled in building scalable systems, automating workflows, and shipping production-ready features end-to-end.

## WORK EXPERIENCE

### Founder / Full-Stack Engineer

#### Truvestor

📅 April 2025 - current

📍 Remote

- Built MVP: Next.js + Supabase SaaS that processes 100K+ rows of market data/day, achieving sub-200 ms average query latency.
- Integrated FinBERT sentiment pipeline—classifies 50K news articles/week with 92% accuracy, driving personalized alerts that boost user retention 18%.
- Deployed CI/CD on Vercel & GitHub Actions; cut release friction from weekly to daily.
- Led 3 contributors, established code-review & linting standards—reduced post-merge bugs 40%.

### Contract Front-End Developer

#### Son of a Tailor

📅 Feb 2025 - April 2025

📍 Copenhagen (remote)

- Re-platformed storefront to Nuxt 3 (Vue 3 + Tailwind/Emotion), introducing PWA support & HTTP/3; FCP improved 3.1 s → 1.4 s and Lighthouse SEO hit 95/100
- Integrated GA4, Segment, Pinterest/LinkedIn/Facebook pixels, and Klaviyo flows; lifted remarketing ROAS 12%.
- Replaced jQuery carousel with Swiper.js and lazy-loading via LazySizes, cutting median page weight 22%
- Implemented error monitoring with Sentry and GitHub Actions gate; post-deploy bugs dropped 40% quarter-over-quarter.

### Web Development Intern

#### Sproutlogix

📅 May 2024 - July 2024

📍 New York, New York

- Automated weekly SQL data-pulls + Python ETL, freeing 5 hrs/week for a data analyst and revealing feature insights that lifted engagement 5%.
- Designed A/B test harness (React front end + Flask API); marketing shipped 4 tests/quarter vs. 1 prior.
- Built D3.js interactive dashboards, reducing stakeholder report prep time 30%.
- Presented findings to C-suite; insights recognized as part of strategic roadmap.

## ADDITIONAL PROJECTS

- Sports Betting Predictor – Trained XGBoost on NBA stats; 54% precision; deployed Flask dashboard for real-time odds scanning.
- AI-Generated Stock Video Tool – Built GPT-4 + FFmpeg pipeline to auto generate videos; automated YouTube uploads with 3-min turnaround.
